1. An electrical high-line is being strung across the river from Hungary to Czechoslovakia at the 1773 kilometer mark on the Danube. Large metal cantilevers are under construction on both sides of the river at this point.
2. Near Bratislava, at the 1866 kilometer mark on the Danube, the Czechs have deforested the left bank of the river and have built a paved incline and paved apron approximately 150 meters long, to be used as a landing place for Czech pioneer troops.
3. At the 1873 kilometer mark on the Danube, Czech pioneer troops have cleared a strip of woods 30 meters wide, probably as a measure against illegal border-crossing in this area.

25X1 1.  Comment: Possibly a high-tension wire.
